

## SAFE-T-ALERT™ REBATE COUNTER CARDS

The enclosed counter top Rebate Card is for display at the dealer Service Counter.

RV Carbon Monoxide, Propane and Smoke Alarms have limited service lives. The limited service life of Safe-T-Alert Carbon Monoxide and Propane Alarms is 5 years and the Safe-T-Alert Smoke Alarm has a 10 year service life.

The Service Counter may take advantage of this Merchandiser in conjunction with the attached 5 year replacement program inspection sheet. Each time a customer's RV is in for service, it is recommended that an inspection be made of the Alarm's age and noted on the attached sheet.

The production date is located on the back of each alarm. When reviewing with the customer, note that the dealer will be able to offer them the rebate form as an incentive for them to have their Alarms updated. You will be offering your customer a great opportunity to save money while offering them the peace of mind that comes with knowing they have current model safety alarms.

The MTI dealer website, [www.mtidealer.com](http://www.mtidealer.com), contains a full set of resources for your dealership. It includes; additional rebate forms, specs, manuals, 5 year replace informational forms and other useful material for your service and sales personnel. For additional training, a dealer's service and sales staff can participate in the "online" training power point presentation. This is a quick and easy reference for bringing all their store and service personnel up to speed on the latest regulations mandated by UL and other regulatory agencies.

Also included in this handout is a cross reference of CCI part numbers to MTI (Safe T Alert) part numbers. As CCI is no longer in business, this cross reference will be helpful for your service personnel when replacing the CCI models with MTI models.

Should you have any questions or require additional rebate counter top displays, please call MTI dealer services at 800-383-0269.

Sincerely,

Tom Wisniewski  
Executive VP
